# REPORT OF THE BOARD OF DIRECTORS.

To the Members of the Union Merchants' Exchange:

GENTLEMEN-It is made the duty of the Board of Directors, under rule four, section six, previous to the Annual Meeting to be held on the first Monday in January, to "fix the assessment to be paid by each member for the coming year, and at the Annual Meeting to report to the Association the amount so assessed, and the pecuniary condition of the Association." At a meeting of the Board on the 28th ult., it was resolved that the assessment for the year 1875, be made Thirty dollars (\$30) for each member, for ten dollars of which there should be issued a certificate, convertible—when presented in sums of one hundred dollars—into stock of the "Chamber of Commerce Association." The report of the Treasurer, which we now lay before you, presents a satisfactory condition of the Finances of the Exchange, there being a cash balance on hand at the close of the past year, of \$1,963.73. During the past year we paid \$12,500 of the subscription of \$50,000 made in 1872 to the stock of the "Chamber of Commerce Association," making a total of \$30,000 paid within the past two years, which is \$3,300 more than the special assessment for that purpose. We are glad to be able to report very satisfactory progress in the erection of the "New Exchange Hall," and that it will be ready for occupancy within the next six or eight months. Ample provision has been made by the projectors of this building for your convenience and comfort, and for a largely increased membership, and when finished and equipped it will be found worthy of this, the largest and most important commercial association in the West. Your Board have expended \$1,426.91 through a "Central Committee," appointed by them for the purpose of preparing and presenting to Congress a statement of the "Necessities of the People of the Mississippi Valley in respect to the transportation of their products, and the improvement of their natural Channels of Commerce," which we believe has already had a beneficial influence, in directing the attention of our Representatives in Congress to the importance of this subject, and the great injustice which has been done to the West and South in withholding appropriations adequate to this purpose. This report was the result of careful labor, and is more comprehensive than any heretofore prepared in the interest of Western improvements.

The Annual Report of your Secretary, of "the Trade and Commerce" of our City, will be laid before you as soon as it can be compiled in convenient form, and will exhibit a satisfactory increase in the receipts of nearly every article of produce, and also in the general business of our city. We feel that it is a subject for sincere congratulation that—not-withstanding the depression which has prevailed throughout the country during the past year, in consequence of the financial revultion at the close of the year previous—our merchants have not only been able to maintain their high financial standing, but have even been favored with prosperity in every branch of business, and have extended our commerce into new territory, thereby drawing to our city new and valuable trade, and have very considerably increased their facilities for the transaction of a much larger volume of trade.

With many advantages secured by the completion of several important enterprises, enabling us to cheapen the handling and transportation of heavy articles of produce and manufacture, and affording us increased facilities for the extension of business, we enter upon a new year with renewed energy and confidence inspired by past success, and in view of a prospect never more brilliant.

I have the honor to be, very respectfully,

WEB. M. SAMUEL, PRESIDENT.

For the Board of Directors.

GEO. H. MORGAN, Sec'y and Treas.

1,963 73

We, the undersigned, a Committee appointed by the President, hereby certify that we have examined the accounts of the Secretary and Treasurer for the year 1874, and find the same to be correct with the proper vouchers on file for expenditures and a balance of \$1,963.73 on hand as stated.

Balanee on hand Dee. 31st, 1874.....

JOHN N BOOTH,
REDMOND CLEARY,
WM. H. SCUDDER,

#### Union Merchants' Exchange—Secretary's Office, St. Louis, December 31, 1874.

WEB. M. SAMUEL, Esq.,

President.

Dear Sir: —I have the honor herewith to submit my Tenth Annual Report of the Trade and Commerce of St. Louis. It is gratifying to be able to report, notwithstanding the depression in the business circles of the country during the past year, that the trade of our city in many instances has increased and in but few cases has fallen off. In nearly all the commodities handled on 'Change, the business has exceeded that of the previous year, and, taken altogether, the result may be considered very satisfactory under all existing circumstances.

In my report I have endeavored to give reliable statistics of receipts and shipments, showing the sources of supply and direction of shipments, prices of various leading articles, and such other information as was within my reach, and, without attempting to discuss the results, leave the public to draw their own conclusions.

During the ten years that I have been connected with our Exchange I have many times regretted that I could not present in a more extended manner the whole business interests of our great and growing city. A report of our manufactures, of the dry-goods, boots and shoes, and other trades, should very properly be included in a report of the "Trade and Commerce of St. Louis." But to compile such a report would require more time and labor than the duties of my office would permit. It is my hope, however, that the occupancy of our new building will so increase our resources and numbers, that the Board will be justified in employing such help as may be necessary to give a full and complete review of all the commercial interests of our city.

The coming year will mark an important epoch in our history. Our Association has increased from a membership of 675 in 1860 to 1307 in 1874, and our rooms, which when first occupied were considered ample for all time, have become entirely inadequate to the wants of our business. Our new Exchange hall—the most magnificent Exchange room in the United States-will be ready for occupancy in September, and by its central position, perfect appointments, and convenient surroundings, will doubtless draw into our Association the representatives of all the great interests of our city, and will be the focus from which will radiate all the influences which will tend to develop the mechanical, manufaeturing, and commercial interests of this great metropolis of the Mississippi Valley. If, then, our merehants are true to themselves and to the interests committed to their eare, who can foretell the possibilities of the future? Already the fourth in population and third in manufactures, may not the next decade see St. Louis the great central eity of the continent, and the centre of commerce, as she is now the centre of population!

As in former years, our Association has carefully guarded the interests of our city and State, and has in many ways used her influence in directing legislation and encouraging projects looking to the good of the West. The united effort of the South and West has forced the General Government to recognize the necessity of an open way to the sea for the commerce of the Mississippi Valley, and there is every indication that the problem will be solved under the direction of one of our own eitizens—the first Engineer of the country, if not of the world— James B. Eads. We have waited long, and are waiting still, for the realization of the grand project of water transportation from the grain fields of the West to the consuming markets of the world. Slowly but surely the work goes on. With an improved river and an open mouth at the Gulf, admitting vessels of all nations without delay or expense, with an increase of tonnage for our eereals and provisions, and with the eyes of all nations looking for a way of lessening eost of food, the grea water route is growing year by year of greater importance; and, as sure as the Mississippi runs to the sea, the day will come when a large part of the surplus productions of this valley must seek a market by way of the Gulf, or be left to rot in the fields. Within another decade the productions of the Great West will have increased to such an extent that it will be impossible, to say nothing of the cost, to move the surplus to tide-water by rail, and it must come down the natural outlet, the Mississippi river. Then will St. Louis solve the problem, which in both ancient and modern times has not yet been realized, that a city can be both a great manufacturing centre and also a commercial metropolis.

In conclusion, allow me to return to yourself personally and to each member of the Board my sincere thanks for the kindness and consideration I have received during our official intercourse. And I cannot close, after ten years of association with the merchants of St. Louis as the Secretary of the Union Merchants' Exchange, without expressing my deep appreciation of the confidence extended to me, and the many acts of kindness received at their hands; and to indulge the hope that any difference that may have arisen in the past may be buried in oblivion, and that as long as we are associated together we may all work for the realization of the one great hope—to make our city the great Commercial Metropolis of the Nation, as she is now the Queen City of the West.

I have the honor to be,

Very respectfully,

Yours, &c.,

GEO. H. MORGAN,
Secretary.

#### NAVIGATION.

The year 1874 was not one of profit to steamboat men generally, and this has been the case for several years. What, in the early years of commerce of St. Louis was a source of great wealth is now considered a hazardous occupation. It can be readily understood that before the era of Railroads, when the commerce of the West had only one means of transportation, namely, by the great rivers, that steamboats could be run profitably under almost any circumstances. But now, when competition is so active, the greatest economy and most systematic management is necessary. It can not be said that because steamboats have not been paying property, that water transportation on our Western rivers is unprofitable to carriers. The regular packet lines have done a fair paying business, for the reason that their boats were run under a system of careful management. Independent boats, looking only to the one trip, have made rates according to the competition then existing, sometimes at fair prices but often at a positive loss. been unsatisfactory to both carriers and shippers. A fair steady rate of freight for high and low water would be far more desirable. But time and experience will remedy the defect and we look for a great improvement in our river marine in the next few years. The Western rivers have been in fair boating stage during the whole year.

The amount of water in the channel out to Cairo was as follows:

From Jan'y 1st to Jan'y 24th, - 5 Feet. From October 2d to Novem'r 1st, 6 Feet. " " 24th to Feb'y 7th, - 12 " | " Novem'r 2d to Dec. 15th, - 5 " | " Novem'r 2d to Dec. 31st, -  $4\frac{1}{2}$ " " Dec'r 15th to Dec. 31st, -  $4\frac{1}{2}$ "

On the first of January heavy ice was running in the river opposite the city and navigation above was entirely suspended. The lower river packets however continued their trips almost without interruption, and there was not a day in the whole year that there was not an open river below St. Louis. During January the Grafton packet made three trips, arriving on the 6th, 14th, and 25th; and the Collossal made two trips from Keokuk, arriving on the 7th and the 11th, but the river above was not fairly open till the middle of February.

Navigation on the Missouri closed with the arrival of the Fannie Lewis from Cambridge on the 26th of November, on account of low water. The Mississippi remained open to Keokuk, and the Illinois to Naples up to the close of the year.

The amount of freight transported during the year was about the same as in 1873, the number of tons received and shipped being as follows:

Received in 1874, 732,765 tons. Shipped in 1874, 707,325 tons. Received in 1873, 801,055 tons. Shipped in 1873, 783,256 tons.

Attention is called to the meteorological tables prepared for this report by Mr. George Prender, in charge of the Department at St. Louis

### FLOUR AND GRAIN.

St. Louis still holds her own as the great flour manufacturing eity of the country. During the year our mills have been run steadily, and the result of the years' business is very satisfactory. Both the receipts and the amount manufactured are greater than ever before, the receipts being 1,683,898 bbls., and the amount manufactured 1,573,202 bbls., which, together with 228,789 bbls. sold by our dealers and shipped direct from the country mills to the consumer, makes a total of 3,485,889 bbls. as the result of the years' business. So it will be seen that this important branch of our commerce is in a flourishing condition. The South is still the largest customer, having taken during the year 1,719,876 bbls., against 1,589,123 bbls. in 1873; of which 1,186,799 bbls. went by water against 1,266,045 bbls. in 1873, and 533,077 were shipped by rail against 323,078 bbls. in 1873. Shipments eastward were 1,232,612 bbls. against 894,712 the previous year.

The receipts of grain also show a gratifying increase, being 22,254,014 bushels against 20,761,273 bushels in 1873, and reducing flour to wheat, as is the custom in compiling receipts, we have a total of 30,673,504 bushels, and 27,243,558 bushels for 1874-73 respectively. The great increase is in flour and wheat, which together aggregate 16,674,712 against 12,667,323 bushels for the previous year. In corn there is a falling off of about 700,000 bushels, and in oats and rye a slight decline, while in barley there is an increase of 262,791 bushels, so that, notwithstanding the fact that the past year was considered a dull one for business generally, the grain trade of St. Louis has increased, and the prospects for the future are encouraging. One item of the trade is worthy of notice, and that is the increased business done for export, via New Orleans. There has been a legitimate demand during the year for wheat and eorn which it is safe to presume will be continued the coming season. reported that large orders are held in New Orleans, and tonnage being now abundant, grain can be forwarded to Europe at reasonable freights. Shipments in bulk were sent every month during the year, except in August and September, and the total amount was 1,047,794 bushels corn, and 365,252 bushels wheat. On pages 44 and 45 will be found a table showing the total movement in flour and grain for the year.

### COTTON.

By the combined efforts of our merchants and the southern Railroads, St. Louis is now firmly established as a cotton market. What but a few years since was deemed an impossibility is now an accomplished fact, and it is the intention and determination of our cotton merchants to continue their efforts until our city is the greatest inland eotton market of the country.

To show the great increase in the trade the following tables are given:

|                            |   | Total<br>Bales Received. | For<br>Re-shipment. | For Sale in this Market. |
|----------------------------|---|--------------------------|---------------------|--------------------------|
| Year ending Sept. 1, 1872, | - | 36,421                   | 19,715              | 16,706                   |
| Year ending Sept. 1, 1873, | - | 59,709                   | 25,494              | 34,215                   |
| Year ending Sept. 1, 1874, | - | 103,741                  | 24,323              | 79,418                   |

Since the first of September, 1874, the increase has been even more marked, the receipts in comparison with the previous year being as follows:

|                           | Total<br>Bales Rece |                   | For sale in this Market. |
|---------------------------|---------------------|-------------------|--------------------------|
| From Sept. 1, to Dec. 31, | 1874 95,78          | 84 30,766         | 65,018                   |
| From Sept. 1, to Dec. 31, | 1873 43,58          | 82 <b>12,</b> 009 | 31,573                   |

As the trade has increased, additional facilities have been provided for storing and compressing until now there are in operation five establishments as follows:

|                                | Storage Capacity. | Compress Capacity.<br>per day. |
|--------------------------------|-------------------|--------------------------------|
| Peper Warehouse,               | 15,000 Bales.     | 500 Bales.                     |
| St. Louis Cotton Compress Co., | 25,000 "          | 1000 "                         |
| Evans' Bros. Warehouse,        | 10,000 "          | 650 "                          |
| Mammoth Warehouse              | - 25,000 "        | 600 "                          |
| Factors' & Brokers' Warehouse, | 20,000 "          | 500 "                          |

The increase in the trade, during the past year especially, has attracted to this market both Eastern and European buyers, and experienced factors from the more Southern cities, until now we have as good judges of the staple as any other market can boast of. A glance at the tables of prices current during the past year will demonstrate to the Planters and Shippers that this is a good market to ship to, and the fact that here their supplies can be purchased from first hands is an additional reason why it is to their advantage to deal with our merchants.

Owing to the financial panic in 1973, the market from the first of October to the middle of December was perfectly demoralized, and offerings during that time were too small and irregular to establish quotations.

The past year was one of the most remarkable in the memory of the trade. With unusual heavy stocks in all the leading markets of the world, and with the certainty of a very large crop having been produced, to come forward, the outlook at the beginning of the year was truly discouraging, and the indications all pointed to a lower range of prices than had prevailed for a long period of time.

With a light stock of old Tobacco, and limited receipts of the new crop, our market ruled very firm for the former, and moderately active for the latter, during the months of January and February; during the succeeding months of March, April, May, and until about the middle of June, with liberal receipts and offerings, composed largely of inferior grades Tobacco, generally in soft condition; and in the absence of any encouraging features in the sea-board marts, our market ruled exceedingly dull and low for Lugs and Shipping Grades Leaf, with a prevailing declining tendency, except for desirable descriptions of Manufacturing Leaf, which, being scarce, commanded much higher prices relatively, than Shipping Grades. About the middle of June, however, information was received from Virginia and Kentucky, that there were indications that the planting in those States would likely be cut short by injury to the plants by insects, and in consequence of a want of a suitable season for planting, the weather being very dry, which reports had the effect to stimulate the demand and improve prices, not only in our own market but elsewhere. At first prudent operators were slow to place much reliance in the probable failure in the planting, and when the subject would be discussed, it was frequently remarked by many of those of long experience, that there was never known a failure of a crop merely for the want of plants, and that often they had known good crops made when planted as late as the middle of July. But it soon became evident that the drouth throughout the Tobacco-growing States was of unusual severity, and that the future course of the market and range of prices depended largely upon the condition of the weather for the ensuing few weeks, during which time it was closely observed from day to day, and was the absorbing theme of conversation among those engaged in the Tobacco trade.

The general feeling, at this time, among dealers appeared to be, that the production of Tobacco for the two preceding years had been too large, and that a partial failure in the crop would be a blessing to the trade, and that while it would apparently be a misfortune to the Planters, it would eventually prove to their benefit also, in reinstating the markets of the world and advancing prices. With continued unfavorable advices from all the Tobacco-growing States, but more especially those of the West, our own State included, although less seriously affected by the drouth than Kentucky and Tennessee, and in sympathy with all other inland markets, our market became very active, with an excited speculative demand, reminding one of the condition of the market during the memorable year of 1864, and prices steadily advanced on all grades until the latter part of July, when, owing to pretty general rains throughout the Tobacco-growing districts of the West, together with continued liberal receipts and offerings, and a heavy accumulation of stocks, a slight reaction took place and prices sustained some decline, but the depression proved of short duration. About the middle of August a renewal of the drouth set in, which induced a return of the speculative demand and an advance in prices.

It now being settled beyond doubt that the crop of the West could not possibly exceed a third of an average crop, and that the crop of Virginia would not probably exceed a half crop, the market assumed a strong position, at a high range of prices. During the latter half of September, however, there was less demand for Dark Grades Leaf, and prices for these descriptions were somewhat easier; but early in the following month the market again became excited, and prices advanced in consequence of information being received of the destruction by frost of the remaining outstanding crop of Tobacco in Kentucky, and of injury from the same cause to the crop in Virginia, and from that time, to the close of the year, the market remained uniformly firm with good demand for all grades at high prices. During the month of Dccember, the offerings were composed largely of the new crop, which found ready sale at from \$1.00 to \$2.00 per 100 lbs. on Lugs and Common Leaf, and from \$2.00 to\$4.00 per 100 lbs. less on the better grades Leaf, than the prices of old stock.

Of the stock of 1724 hhds, remaining in the warehouse at the close of the year, probably less than 300 hhds, is held for sale, the balance being owned by manufacturers; hence, upon the resumption of business this season, our market will be almost entirely dependent upon the new crop.

The crop of our State, marketed last year, exceeded in quantity our estimate made at the beginning of the season, several thousand hhds., and proved to be the largest crop produced since 1863. In quality, however, it was generally inferior; the proportion of Lugs and Common grades, frosted, green and worm-eaten leaf, being large, and still there was a very fair amount of goed serviceable Working and Shipping Leaf. The quantity of the finer grades, Bright, Colory Leaf was very small, and our market was almost entirely dependent upon the Virginia and Kentucky markets for a supply of Bright Wrapping leaf. With regard to the crop produced last year in our State, would remark, that, owing to the indifference among Planters generally, about cultivating the article, in consequence of the extreme low range of prices ruling prior to the planting season, in the first place, and the subsequent unprecedented drouth, continuing with rare intermissions during the entire summer months, it is comparatively a light one, but believed to be about half the size of that of the preceding year, and generally estimated at about 12,000 blids. In quality it is believed to be good, better perhaps than for several years past. It is generally represented to be of good size and substance, but lacking perhaps in brightness of color, although in some favored localities the crop is reported as being unusually good in every particular. There will doubtless be a scarcity of fancy Bright Wrapping Leaf, but we feel confident, from what we hear and have seen, that an unusually large portion of the crop of our State is admirably adapted for manufacturing purposes, which, if the case, will be a very fortunate circumstance, and will doubtless have the effect of attracting to our market manufacturers and dealers from less favored points. We learn that already there are quite a number of manufacturers from different places, buying Tobacco pretty freely at various points in the country, doubtless being impressed with the idea that our market will likely rule very high the coming season, or might not furnish a sufficient supply for the wants of the trade.

We are happy to state that a much larger proportion than usual of this crop of our State was offered and sold in our market during the past year, less than one fourth of the receipts having gone through to other markets, which was owing to the fact that our market, as well as other Western markets, kept in advance and ruled relatively higher, during the first half of the year, than the sea-board and foreign markets; and we think it likely the same will be the case the present year, as in view of the small crop produced last year, from which our Western manufacturers will have to draw their supplies, we think it reasonable

to suppose that they will be enabled to pay higher prices for Tobacco than the shipping demand will justify, stocks being unusually large in the sea-board and English markets.

It is gratifying to be enabled to report the Tcbacco manufacturing interests of our city in a prosperous condition, with good prospects of a steady increase in this important industry. The desirable chewing qualities of the Tobacco grown in our State has enabled our manufacturers to establish an enviable reputation for their brands of Tobacco, throughout the length and breadth of the land.

The present position of the markets at home and abroad is certainly a strong one, and in view of the remarkably small crop produced last year, to come forward this, it is only a reasonable conclusion, we think, to anticipate a continuance of high prices, until, at least, it is definitely determined in reference to this years' production. The inducements for planting a large crop the coming season are certainly unusually great, and in the event of a large planting throughout the West, with favorable prospects of a heavy crop being raised, prices will, in all probability, eventually be affected to some extent, but stocks will be so nearly exhausted at the close of the year, that we do not think any very large decline in prices need be apprehended in the event of a large production, and planters consequently should not be discouraged from planting a big crop. We have never known a more favorable opportunity than presents itself at the present time, for farmers generally throughout our State to engage in the cultivation of Tobacco, and we would most earnestly urge upon them to do so. We do not recommend the cultivation of Tobacco to the exclusion of other crops, but most of our farmers can raise, in addition thereto, a few acres more or less of Tobacco, for which we feel confident they will obtain very remunerative prices the following year, as last years' drouth has occasioned a vacuum that will require several successive large crops to again reduce the value of the article below its productive cost.

Stocks, it will be seen, at the close of the year, foot up very heavy and are especially large in the New York and English markets, which being the case, there may not be any very large shipping demand at current high prices, but we anticipate an active home demand, so soon as the weather will admit of the manufacturers of the West resuming operations, and are inclined to think that early sales, that is prior to June, will be the most advantageous.

We understand that the great bulk of the crop of our State, in the Missouri River district, has already been bought up by re-handlers at a range of from \$7.00 to 11.00 per 100 lbs., crops round; generally at \$9.00 to \$10.00, which would indicate that operators in the country, at least, have great confidence in reference to the future of Tobacco.

The Tobacco Association of our city is endeavoring to secure a sufficient quantity of Tobacco seed, for which it is presumed there will be a large demand, to supply the wants of those desiring to cultivate a crop, which will be gratuitously distributed upon application to Mr. J. F. Webber, Secretary of the Association, who also has for distribution pamphlets containing numerous practical and valuable essays on the proper culture and management of Tobacco. The Association referred to, composed of the Tobacco dealers of our city, feel deeply interested in the cultivation of Tobacco in our State, which they know to be so peculiarly well adapted, both in soil and climate, for its production, and is disposed to do all in its power to assist and encourage a more general cultivation of this important staple throughout the State.

### LUMBER.

[From the Annual Lumber Circular of Messrs. Berthold & Jennings.]

St. Louis probably offers a fair criterion of the different markets, and her dealers have no doubt fared as well as the majority. The trade of the city extending through 1874 has, as a general proposition, proved otherwise than remunerative, and only a very few can show a profit on their balance-sheet. We think, however, from their course and general condition at this time, that they were well prepared for extreme lethargy and low prices. The shipments show a deficit of 9,868,000 feet. For this deficiency in the shipping trade it is only necessary to recognize the effects of droughts in certain districts, the grasshopper plague and the condition of the farmers at the periods when their demands for lumber usually occurred. Another cause for this falling off is the energy put forth by up-river markets to obtain the Western trade, which they were enabled to do by their improved railroad facilities, and the additional fact that the manufacturers have inaugurated the system of shipping, where possible, direct to country yards in car-load lots, virtually taking the position of wholesale yards, and in a measure killing the goose that laid the golden egg. The yards here have used praiseworthy enterprise in striving to enlarge and extend the trade with the country west, but during the past twelve months, in view of the circumstances connected with the business financially, &c., they have directed their efforts more particularly to the city demand

It is worthy of mention that the yards during the past year have been actuated by a different or rather new principle, and in their mode of action have introduced a system which will be notable in affecting future transactions. The profits have dwindled down, and seemed to have but a small relative value in consideration with the grand point—to sell; and a uniformity in prices between yards has not been a feature of the business in 1874. In fact, purchasers went the round before deciding as to their best offers.

White Pine.—Quotations for this article throughout the year were entirely nominal, and depended on the chances of the market and condition of the holder. Receipts fell below those of 1873, 60,758,000 feet. The prices opened at \$13 and \$14 for Minneapolis and Chippewa, and \$16 to \$23 for good to choice Wisconsin, and closed at \$11 to \$14 for former, and for Wisconsin river at \$10.50, and \$12 for common, and \$16, \$18, \$20 and \$21 for choice. There was no activity at any time, and no speculative feeling existed. Dealers only bought to replace stocks. Included in the stock on hand are 20,145,000 feet held for manufacturers' account.

YELLOW PINE.—The receipts for 1874 exceed those of 1873, 979,000 feet, a matter of little moment. This is caused by the receipt of

1,500,000 feet of piles. Dimension and bill-stuff fall below the amount received in 1873, about 4,500,000 feet, and flooring lumber is in excess, 5,500,000 feet. The low prices and excessive freights prevent the shipping of dimension-stuff at a profit, and to this may be attributed the decrease in receipts of 1874. Flooring, boards and strips, was the only article at prices justifying in any degree its manufacture.

Poplar and walnut were only in fair demand, and prices generally unsatisfactory.

Hard woods proved dull, and prices were low.

### RECEIPTS OF 1874.

| White Pine, by raft         | 84,439,000 feet. |
|-----------------------------|------------------|
| White Pine, by railroad     | 6,056,000 feet.  |
| Yellow Pine, by railroad    | 23,650,0 0 feet. |

|               |      | _ |                       |

It is impossible, or at least unwise, to make prognostications in regard to next season's trade, taking the past as a basis, and we therefore confine ourselves to a statement of the facts and figures. A review of the past year does not possess any attractive features, and presents little of a gratifying character. The tendency has been in reality for the past few years downward, and we only see the results of the operations carried on by manufacturers. The absence of the usual demand from railroads has been marked and felt, particularly in yellow pine and hard woods. Prices are very low, but are without any visible tendency. The operations in the pineries this winter will be fully equal to last winter's work if the season admits it, and so far the only obstacle in the way of the success of those engaged in logging has been the want of sufficient snow.

Yellow pine in Missouri is fast becoming exhausted, and the supply for next year will not be as large unless prices increase. The mill-men have not the capital to stand a drain for any length of time, and must, from necessity, cease manufacturing.

### LIVE STOCK.

The increase in the Live Stock trade during the past year is very marked, and is the result of the establishment of proper facilities for the handling of the same. The completion of the National Yards in 1872, followed by the opening of the Union Stock Yards in 1874 has made this a convenient market for dealers, and naturally the trade is growing. Not only is the trade of the West and South-west increasing, but the receipts from States East of the Mississippi have largely increased, showing that we are drawing supplies from points tributary to other markets. The completion of the Iron Mountain Railroad to the Texas line has drawn large shipments of cattle, and even live hogs have come forward by that route from Texas. Eastern buyers have found this an advantageous market, and we may safely say that the trade is now established on a firm basis and will continue to increase from year to year.

### HEMP AND BAGGING.

The production of Hemp is steadily decreasing, year by year. The introduction of Flax and Jute for bagging, and Iron Ties for baling, has limited the demand for Hemp, and the crop to come forward in 1875 will be from one third to one half that of 1874. The receipts of Hemp and Tow for the past year were 11,266 bales against 16,860 bales in 1873 and 20,790 bales in 1872. The quality of fiber and manner of handling averaged about equal to that of 1873 and 1872. The demand from local and eastern spinners for best grades was good throughout the year.

### BAGGING.

The general depression caused by the panic of the Fall of 1873, materially affected the price of Bagging, and at the opening of the year 1874, it was selling at figures that (when difference in weight is considered,) were lower than had ever been known. This fact, with the general belief of a larger cotton crop for 1874 than had been made since the war, induced dealers and speculators to take hold early in the year, and there was quite a brisk demand until the overflow of a vast extent of country in the cotton district threatened to cut the crop down below an average of former years, and brought the trade to a complete stand. As soon as it was known that the damage from overflow would be but slight, comparatively, the demand set in again at satisfactory prices, but later rumors of drouth again checked the demand, and caused buyers to hold off and buy only as orders came in. Early in November the failure of large holders in New York and at this place, threw a very large quantity on the markets, to be realized for, at best price readily obtained. This completely demoralized the markets everywhere, and prices were down to a figure that would not cover the cost of production at the mill. From this demoralization the market is now recovering, and as the stock in the country is now very much less than usual, and the production to a great degree stopped, (not more than half the looms in the country being now running,) the prospect is good for a speedy resumption of prices that will enable manufacturers to commence work again.

The article is now made almost entirely from Jute Butts, mixed with low grade Jute or rejections—this fiber having been imported in such large quantities and at such low prices as made it cheaper than either Hemp or Flax. We understand that the quality of Butts for this years' consumption is very poor, and that to work them, a larger proportion than usual of Jute will have to be used. This, added to the duty now imposed on Butts will make a very material difference in cost of manufacture for this year, as compared with last. The amount manufactured was 3,500,000 yards, and the stock on hand at the close of the year, 13,500 rolls (of 50 yards,) Domestic, and 4,000 rolls India.

### PROVISIONS AND PACKING.

The following tables give the results of the years' business. The volume of trade has fallen off somewhat, from various eauses, and the prospects for the eoming year are as yet undetermined. The number of hogs packed at this point will probably be less than last season, as a number of our large houses laid idle rather than pack at the high prices prevailing, believing that they could buy the product cheaper than they could manufacture it—The receipts of hogs have largely increased, and had the market opened at prices to justify, our packing would doubtless have equaled if not exceeded last season.

### PRICES OF SOFT MISSOURI LEAD FOR 1874.

Mine La Motte 14@1/2c per lb less.

### WOOL, HIDES AND PELTS.

The trade in these articles has grown to immense proportions. Our dealers have aimed to make St. Louis the greatest wool market in the West, and their efforts have been crowned with success. There is a large demand all the year from the West, and during the past season the eastern mills have been represented by their agents who bought liberally. Hitherto our receipts have been given in packages, but hereafter the reports will be kept in pounds, so that the extent of the trade may be more clearly shown. According to the estimates of dealers, the receipts for 1874 were 4,800,000 lbs. native, and 2,000,000 lbs. New Mex. ico and Colorado wool. In addition to the receipts, the pullers of St. Louis furnished upwards of 600,000 lbs., making a total of 7,400,000 lbs. as the result of the years' business, all of which found a ready home market. The receipts of hides have also largely increased, the receipts being estimated at 1,000,000 pieces. The largest receipts are by the Southern Railroads, and are constantly increasing. Hereafter we shall endeavor to give more full and complete statistics of these important articles.
